EDUCATION

Carnegie Mellon University 2025 - 2026
5th Year Master's in Computer Science *Pittsburgh, PA*

- **Advisors:** Prof. Vincent Conitzer, Prof. Zhijing Jin
- **Research Areas:** Multi-Agent LLM Systems, AI Safety
- **Selected Coursework:** Trustworthy AI Theory & Practice, Generative AI, Randomized Algorithms, AI as a Co-founder

Carnegie Mellon University 2021 - 2025
Bachelor of Science in Computer Science *Pittsburgh, PA*

- **Additional Major** in Computational and Applied Mathematics, **Minor** in Computational Finance
- **University** and **College** Honors (QPA: 3.82/4.0)
- **Selected Coursework:** Continuous Time Finance, Operations Research, Numerical Methods, Modern Regression, Partial Differential Equations, Monte Carlo Methods

RESEARCH EXPERIENCE

The Structure of Deception: How LLM Agents Lie, Break Promises, and Exploit Trust in Multi-Agent Settings
CMU Master's Thesis, advised by Prof. Vincent Conitzer & Prof. Zhijing Jin

- Built a unified framework for measuring LLM deception across one-shot games, repeated games, and open-ended resource simulations, covering taxonomy, empirical evaluation, and monitoring failure modes. Defended April 2026.

Why Multi-Agent Conversations Cannot Fix LLM Forecasting
CMU Bachelor's Thesis, with Prof. Vincent Conitzer & Aditi Raghunathan

- Investigated multi-agent calibration for LLM forecasting, finding conversational and mathematical methods equivalent and that model size critically determines outcomes, with mid-sized models improving 28.3% while larger models form overconfidence-amplifying echo chambers.

Predictive Power of LLMs in Financial Markets
CMU, with Prof. Burton Hollifield

- Investigated whether LLMs can extract predictive signals from Federal Reserve Beige Book data to forecast cross-asset correlations and improve investment decisions, finding that traditional transformer models outperform GPT due to look-ahead bias. (First place in Meeting of the Minds Math Division)

PUBLICATIONS

Conference Papers

10. **AM-Bench: A Unified Taxonomy and Evaluation Suite for Agentic Misalignment**
Eric Zhang, Terry Jingchen Zhang, Chijioke Ugwuanyi, **Jerick Shi**, Bernhard Schölkopf, and Zhijing Jin
Accepted at *NeurIPS 2026 Evaluations and Datasets Track*

Under Review

9. **Do Agents Keep Their Word? Promise-Breaking in Multi-Agent LLM Systems**
Jerick Shi, Terry Jingcheng Zhang, Zhijing Jin, and Vincent Conitzer
Under review at *ICLR 2027*
8. **LiveHumanRightsBench: Do LLMs Change Judgments for the Right Reasons?**
Terry Jingchen Zhang, . . . , **Jerick Shi**, . . . , and Zhijing Jin
Under review at *ICLR 2027*
7. **What Would It Take to Show That an LLM Deceived?**
Jerick Shi, Terry Jingcheng Zhang, Zhijing Jin, and Vincent Conitzer
Under review at *TMLR*

Workshop Papers

5. **When Agents Lie: Premeditation, Persistence, and Exploitation in Repeated Games**
Jerick Shi, Terry Jingchen Zhang, Bernhard Schölkopf, Vincent Conitzer, and Zhijing Jin
Accepted at *ICML 2026 New Frontiers in Game-Theoretic Learning (NExT-Game) Workshop*, **Best Paper Award**
4. **What Game-Theoretic Benchmarks Miss: Strategic Silence in Multi-Agent LLMs**
Jerick Shi, Terry Jingchen Zhang, Vincent Conitzer, and Zhijing Jin
Accepted at *ICML 2026 Workshop on Failure Modes of Agentic AI*
3. **Cheap Talk, Empty Promise: Frontier LLMs easily break public promises for self-interest**

Jerick Shi, Terry Jingcheng Zhang, Zhijing Jin, and Vincent Conitzer
Accepted at *ICLR 2026 AI for Mechanism Design and Strategic Decision Making Workshop*

2. **From Hallucination to Scheming: A Unified Taxonomy and Benchmark Analysis for LLM Deception**
Jerick Shi, Terry Jingcheng Zhang, Zhijing Jin, and Vincent Conitzer
Accepted at *ICLR 2026 Agents in the Wild: Safety, Security, and Beyond Workshop*

1. **Market-Dependent Communication in Multi-Agent Alpha Generation**
Jerick Shi, Burton Hollifield
Accepted at *NeurIPS 2025 GenAI in Finance workshop*

WORK EXPERIENCE

Voleon Group, *Software Engineer* — July 2026 - Present
Carnegie Mellon University, *Teaching Assistant* — 2022 - 2026
Xencio, *AI Development Intern* — June 2023 - Aug 2023

AWARDS & HONORS

1. **Best Paper Award**, ICML 2026 New Frontiers in Game-Theoretic Learning (NExT-Game) Workshop, 2026.
2. **Optiver Market Making Game**, 4th place out of 20 teams, 2025.
3. **IMC Prosperity Trading Competition**, Top 250 out of 13,000+ teams, 2024.
4. **Mathematical Contest in Modeling**, Honorable Mention, Top 35% out of 18,000+ teams, 2024.
5. **Carnegie Mellon University Quantathon**, Top 8 out of 40 teams, 2023.
6. **83rd Putnam Competition**, Top 25% out of 3415 participants, 2022.

SKILLS & INTERESTS

Languages	English (native), Mandarin (native), Spanish (intermediate)
Programming Skills	Python (NumPy, Pandas, SciPy), C/C++, Java, Javascript, R, HTML/CSS
Clubs and Activities	CMU Tricking Club (Vice President), CMU K-Pop Dance Club (Film Co-chair), CMU C
